Fiber Soft Lounge Chair Tube Base

"One of the most difficult and noble disciplines of design is to create simple, well-functioning, and almost ordinary objects that nevertheless have a strong identity. We designed the Fiber Soft Lounge Chair to do just that. The chair's sculptural language, paired with its wide and ultra-soft seat, refuses to compromise on comfort and invites the user to be seated for hours on end. Through soft vatting and upholstery, the Fiber Soft Lounge Chair enhances the idea of grand comfort. The chair's inner shell is made using recycled plastic for a conscious and innovative perspective on materials."

— Iskos-Berlin

Designed by	Iskos-Berlin
About the Designer	Iskos-Berlin is a Copenhagen-based design duo that has made international headlines within furniture, industrial and graphic design. The studio, formerly known as Komplot Design has collaborated with some of the world's most prestigious manufacturers and their furniture, lighting and other design products are exhibited at numerous design museums around the world including MoMA and the Designmuseum Denmark.
Environment	Indoor
Country of Production	Poland
Description	Developed from the Fiber Lounge Chair's soft, embracing curves that provide generous comfort within a compact footprint, the Fiber Soft Lounge Chair retains its refined, space-conscious character while introducing a more cushioned expression. The upholstery enhances the gentle form with added depth and tactility, creating a warm, inviting seat. The chair's shell is made from 100% recycled plastic, supported by a slender tube base that lends a light expression.
Material	The shell is made using 100% recycled plastic reinforced with strength-improving additives and mixed with up to 25% FSC™- certified (FSC-C028824) wood fibers. The recycled plastic comes from post-industrial waste. The shell is upholstered with several layers of foam and wadding, then finished with upholstery in textile, imitation leather, or leather—the leather is sourced from selected premium suppliers. Tube base in powder-coated steel. Plastic glides included. Felt glides are available as a spare part.

Tube Base

Cleaning & Care

Textile: For stains, non-greasy marks should be gently dabbed with a lint-free cloth or sponge wrung out in clean, warm water. If needed, a mild solution of dish soap and water may be used, followed by clean water. For fabric-specific instructions, maintenance guidelines should be consulted directly from the textile supplier (e.g., Kvadrat.dk, Nevotex.dk, Maharam.com, or Gabriel.dk), as cleaning methods vary.

Imitation Leather: Should be cleaned with lukewarm, pH-neutral soapy water using a soft cloth or soft brush. Solvents and general chemical cleaners should be avoided; alcohol-based cleaners may be used. The surface should be wiped with a damp cloth to finish.

Leather: Leather is a natural material that develops character over time with regular care.
Refine Leather, Easy Leather, and Endure Leather: Should be dusted regularly with a dry cloth. The leather should be treated at least four times a year using dedicated leather-care products. For further guidance, ca-mo.com can be consulted.
Allure and Grace Leather: Should only be vacuumed with a soft brush. Soap and water should not be used, as they may remove the leather's velvety finish. Leather grease and chemical products—including saddle soap, general leather cleaners, and household agents—should be avoided.

Base: Wipe with a cloth dampened with water. If needed, a mild detergent or dish soap may be used. Concentrated or abrasive cleaning agents should be avoided, as the finish may be damaged. After cleaning, the surface should be dried thoroughly with a soft, clean cloth to remove any remaining moisture.

Fiber Soft Lounge Chair Tube Base

Dimensions

Fiber Soft Lounge Chair Tube Base

Height:	74,40 cm / 29.3"
Width:	60 cm / 23.6"
Depth:	69 cm / 27.2"
