Coffee Waste Black, Coffee Waste Light, Coffee Waste Rust Red: coffee shell waste from BKI's coffee roasting process mixed with post-consumer e-waste.

Colours

Coffee Waste Black
Coffee Waste Light
Coffee Waste Rust Red

Maintenance guide

Please note that this product is handcrafted and made from natural fibers, and recycled plastic - each piece is unique, and its appearance may vary from item to item.

Matek™

The Matek™ material is made from a mix of recycled fibre and plastic waste. It offers a strong, durable surface that is easy to clean and requires very little maintenance.

For daily care, it is recommended to dust the surface with a soft cloth. The surface can be cleaned with a soft cloth wrung out in a mild solution of lukewarm water and a universal cleaning detergent. Avoid using abrasive cleaning agents and harsh detergents, as these may damage the surface.

Avoid placing Matek™ furniture in direct sunlight, excessive heat, or humidity over longer periods of time, as this can affect the appearance of the material.

As Matek™ furniture is made from a blend of natural materials, each piece is unique, and its appearance may vary from item to item. A slight change in colour over the years is also to be expected.

Matek™ furniture also has a distinct smell when first unpacked, but this will fade after a few days of use.

Recommended Light Source - NOT INCLUDED

LED GX53
4,9 W
480 lm
2700 K
CRI Ra 80
Energy class: F

Installation Guide

Components

1x Lamp

3 x Screws

1 x Allen key

Tools needed

Drill

Wallplugs

Screwdriver

GX53 Light source

Spirit level

Note that the listed tool are not included.

Safety precautions

The lamp is intended for indoor use.

Consult a professionally qualified electrician if in any doubt. Before starting the installation, disconnect the power supply by turning off the circuit breaker or by removing the fuse at the power off. Using the light switch is not sufficient to prevent electrical shock.

If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid any hazard.

1

Carefully loosen the lamp from the wall bracket, by unscrewing the two screws using the allenkey.

2

Once the two screws have been removed, carefully pull out the wall bracket.

3

Connect the wires from the outlet with wires from the lamp. **PRECAUTIONS:** The core with green/yellow insulation must only be connected to a terminal marked with \perp or \perp .

4

Install the wall bracket and make sure the two bottom holes of the wall bracket are level.

5

Drill holes for the wall bracket. Make sure to use the correct plugs for the wall. Tighten the three screws to ensure the bracket is safely fixed.

6

Place the lamp onto the wall bracket, then secure it by inserting and tightening the two screws using the Allen key.

9

Reattach the difuser by tightening the small screws. Be careful not to over-tighten. The power is now ready to be turned on.

10

You can now use your Terra Wall Lamp.

Note: The lamp is dimmable if connected to a light dimmer switch.

7

To insert the light source, remove the difuser by unscrewing the three screws.

8

Insert the light source and secure it by turning it to the right. Reattach the difuser - do not to overtighten the screws as this may damage the difuser. The power is now ready to be turned on.
