

Linear Steel Bench w. Backrest

“The Linear Steel Series was designed from the idea of presenting durable materials in a sophisticated and understated expression for outdoor use, with its form language inspired by the notion of meetings—the meetings of lines, the meetings of shapes, and the meetings of materials. The design is defined by its straight lines for a contemporary yet timeless aesthetic through the details of its folded edges, half-circular intersecting legs, and small spacing for easy outflow of water. It is through these subtle elements that the Linear Steel Series translates the values of elegance, longevity, and functionality into modern outdoor furniture.”

— Thomas Bentzen

Designed by	Thomas Bentzen
About the Designer	Thomas Bentzen, former Head of Design at Muuto, started his own studio in 2010. Bentzen’s designs are characterized by simplicity, rationality and functionality — always firmly rooted in the Danish design tradition, material knowledge, craftsmanship and rational industrial manufacturing processes. His work continues to receive international recognition at fairs and exhibitions all over the world.
Environment	Outdoor
Country of Production	Sweden
Description	The Linear Steel Bench with Backrest combines comfort with a clear, modern expression. Its sculptural form works well as a standalone piece or alongside other designs in the Linear Steel family, offering versatility for a variety of outdoor settings. Defined by clean lines and understated details, the bench brings a fresh and refined presence to terraces, gardens, and public spaces. Made from durable, powder-coated steel, it is designed to withstand the elements while maintaining its long-lasting aesthetics. With the addition of a supportive backrest, the design enhances seating comfort while retaining the minimal character of the Linear Steel family.
Material	Powder-coated steel: The seat, backrest, and legs are made 77% recycled steel - galvanized and finished with a weather-resistant, UV-resistant, deep matte powder coating. This surface treatment gives the material a subtle, textured appearance and elegant feel while adding durability and making it suitable for outdoor use. Legs are fitted with plastic glides.
Cleaning & Care	Powder-coated steel: The surface should be cleaned with a cloth dampened with water. If needed, a mild detergent or dish soap can be used. Concentrated and abrasive cleaning agents should be avoided, as these may damage the finish. The surface should always be wiped dry with a clean cloth. Any liquids, grease, or residues should be removed immediately to reduce the risk of stains and marks. Care should be taken when handling hard objects such as tableware or porcelain near the furniture, as impacts may cause scratches. Benches and tables should never be stacked on top of each other, as contact between surfaces may result in damage. In the case of minor scratches, guidance on suitable outdoor paint products should be obtained from a local hardware store.
